Allowable Subject Matter

1. Claims 1-2, 4-8 contain allowable subject matter over the prior art of record.
2. The following is an examiner's statement of reasons for allowance:

The claimed invention is directed to a disk apparatus. The independent claim identifies the feature of "the memory control means sets the identification information based on the address information in the nonvolatile memory at start of operation of said disk apparatus; and the memory control means checks if the identification information indicating a file end is recorded for a last block of each file, and sets the identification information indicating a file end is recorded by detecting a successfully recorded block immediately before there is no identification information indicating a file end is recorded for a last block of the file". The closest prior art, Teichu (JP 9-153250) discloses a conventional disk apparatus, either singularly or in combination fails to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
